An event during which a small coastal town opens a window into its world, its essence, to showcase its original customs, indigenous products, traditional expressions, and the beauty of its cultural and historical heritage. You simply must fall in love with the charm of Selce. And the best opportunity to do so is at the Ethno Festival (Sr)etno Selce, where you can experience all of this at once. Traditional customs and skills are presented in an engaging way to younger generations, as well as to tourists, while older generations have the chance to nostalgically reminisce. The two-day program will be enriched on the first day by Klapa Tramuntana, Karin Kuljanić, Mario Battifiaca, and Robert Grubišić, and by Music Group Cambi on the second day of the event. Come and see why the whole world is beating empty straw without reason, while only the people of Selce do so with purpose.

TOURISM DAY

A small coastal town that charms with all its offerings and natural beauty – Selce – got its first public beach on August 4, 1894. In addition to being an important part of the tradition, this day is considered the beginning of organized tourism. In honor of this, the valuable tradition has been celebrated for over half a century, and a festive mood prevails. The event was once called the Venetian Night, and later it was renamed Tourism Day. The evening is reserved for a boat ride, decorated with lanterns and ash branches, led by a large sailing ship. Visitors can enjoy a feast by Music Group Vigor, and at midnight, a fireworks will take place over the sea. You are invited to join us in celebrating Selce and its tourists with a rich cultural, entertainment, music, and food program! Let Selce serve you the sea and tradition on a plate, a vineyard in a glass, and the warmth and love of its hosts in the heart.

The ^{13th} Oily Fish Month

RIVIJERA CRIKVENICA

During September and October, the Oily Fish Month takes place, part of the Oily Fish Road project designed by the Tourist Board of the City of Crikvenica, and inspired by the rich fishing history of the region. Why oily fish? Primarily because it was once one of the most important ingredients in traditional cuisine. Moreover, Crikvenica fishermen, as early as the 18th century, were skilled and well-known masters in catching oily fish as well as other types, with many passing down their knowledge and skills to generations of fishermen around the world. Discover how the traditional ruler of the region's gastronomy will surprise you during the Oily Fish Month, how it will impress your taste buds, and what programs are being organized in its honor.
